

# Notifications - Exit Employee

## 1. Objective & Scope

When an employee resigns, the corporate employer informs Tide. Tide Operations then triggers the exit/closure workflow via the Tide BOT interface.

The objective of this specific requirement is to **instantly notify the exiting employee across multiple channels (Push, Email, and SMS)** as soon as the Tide Operations team successfully submits the closure request in the BOT.

This ensures transparency, outlines the timeline for fund addition freezes, and provides critical tax optimization advice regarding their remaining wallet balances.

## 2. User Personas & Triggers

- **User Persona:** Exiting Employee holding a Tide Benefit Card.
- **Trigger Event:** `EXIT_REQUEST_SUBMITTED_SUCCESSFULLY` via the Tide BOT Exit Employee Management flow.

## 3. Functional Requirements

### 3.1 Workflow & Logic

1. **Event Listening:** The Tide Notification Engine must listen for the successful submission event from the BOT Exit Management system.
2. **Data Payload Requirements:** The trigger payload from the BOT must pass the following variables to the Notification Engine:
  - `Employee_First_Name`
  - `Employee_Email`
  - `Employee_Phone_Number`
  - `Employee_Device_Token` (for Push)
  - `Company_Name`
  - `Last_Working_Day` (LWD)
3. **Multi-Channel Dispatch:** The system must simultaneously trigger a **Push Notification, Email, and SMS**.

### 3.2 Business Rules & Constraints

- **Fund Top-ups:** No funds can be added to the Tide Benefit Card *after* the `Last_Working_Day`.

- **Wallet Tax Implications:** \* Employees must use funds in **Telecom** and **Fuel** wallets **on or before** the `Last_Working_Day` .
  - Post-LWD, any leftover balance in these wallets will automatically sweep into the **General Wallet** and become fully **taxable** as per corporate tax guidelines.

#### 4. Communications

##### Channel 1: Push Notification

- **Trigger Timing:** Within 30 seconds of BOT submission.
- **Deep Link:** Directs user to the "Wallet Balance" or "Account Status" page in the Tide App.

| Field             | Content                                                                                                                                                                          |
|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Title             | Update regarding your Tide Benefit Card                                                       |
| Body              | Your closure request has been received from <b>[Company_Name]</b> . Use your Fuel & Telecom balances before your last working day to avoid tax liabilities. Tap to view details. |
| Deeplink for Push | <link to the Banner message>                                                                                                                                                     |

##### Channel 2: SMS

- **Trigger Timing:** Within 60 seconds of BOT submission.
- **Fallback:** Priority high (ensure delivery even if the user is offline).

##### SMS Template:

Hi **[Employee\_First\_Name]**, we have received a request from **[Company\_Name]** to close your Tide Benefit Card. Note: No funds can be added after your last working day (**[Last\_Working\_Day]**). Please utilize your Telecom & Fuel wallet balances before your last day, as any remaining balance will be transferred to your General Wallet and will become taxable. Team Tide.

##### Channel 3: Email

- **Format:** HTML Rich Text Block

| Field | Content |
|-------|---------|
|-------|---------|

|                |                                                                |
|----------------|----------------------------------------------------------------|
| <b>Subject</b> | Important: Closure request received for your Tide Benefit Card |
|----------------|----------------------------------------------------------------|

Email Body Template:

**Dear [Employee\_First\_Name],**

We would like to inform you that Tide has received a request from **[Company\_Name]** to initiate the closure process for your Tide Benefit Card due to your upcoming separation from the company.

 **Key Timelines & Action Items:**

- **No More Fund Additions:** You will not be able to load or receive any new funds onto your Tide Card after your last working day: **[Last\_Working\_Day]**.
- **Wallet Utilization (Action Required):** We strongly recommend utilizing all remaining balances in your **Telecom Wallet** and **Fuel Wallet on or before** your last working day.

 **Tax Implications:**

Please note that any leftover balance remaining in the Telecom and Fuel wallets after your last working day will automatically be moved to your **General Wallet**. Once moved to the General Wallet, these balances will **become fully taxable** as per regulatory mandates.

If you have any questions or require immediate support, please contact our helpline.

Best regards,

**Team Tide**

## 5. Non-Functional Requirements (NFRs)

- **Reliability:** The Notification Engine must have a  $\$ > 99.9\%$  delivery success rate across all channels.

- **Audit Trail:** Every notification sent must be logged against the Employee's Unique ID in the system backend for customer support audits.

## 6. Success Metrics & Analytics

- **Delivery Rate:** Track successful delivery percentages for Push, SMS, and Email individually.
- **Click-Through Rate (CTR):** Track open rates of emails and click rates on the App Push notification to verify user engagement.
- **Support Ticket Deflection:** Measure if there is any influx of support tickets post-separation regarding "unexpectedly taxed wallets" to gauge clarity of communication.
