

Credit Card Redirection Flow - Roarbank

Credit Card redirection flow - Roarbank by USFB

This Product Requirement Document (PRD) outlines the redirection journey from the Tide app to the RoarBank app. The journey includes an internal landing page to ensure a seamless transition, communicate value, and maintain regulatory compliance by clearly communicating the terms and conditions.

1. Executive Summary

To provide Tide members with seamless access to credit card products, we are doing a POC by introducing a redirection flow. This flow guides users from a "RoarBank Credit Card" entry point in the Tide app through an informative landing page, ultimately leading them to the RoarBank Mobile App for Credit Card application and fulfillment. Members will also be targeted through digital channels which will land them to the landing page in the Tide App.

2. Goals & Objectives

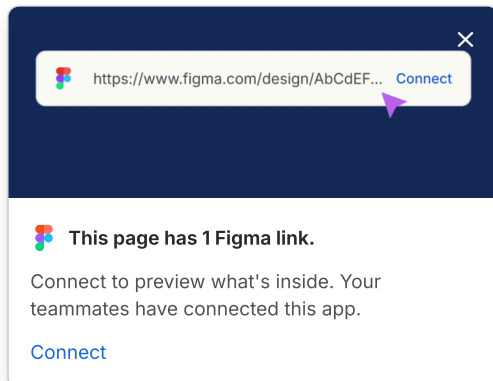

- **Conversion:** Drive high-intent traffic from Tide to RoarBank.
- **Education:** Ensure users understand the value proposition (USPs) before leaving the Tide ecosystem.
- **Compliance:** Display mandatory Bank Terms and Conditions (T&Cs) and clear redirection disclaimers.

3. User Journey & Functional Requirements

The journey has been split for both RMs and KMs.

KM (Known Member) Journey

Step 1: Entry Point

entry point (Banner or Menu Item) titled "Apply for Credit Card." targeted to the Interim Landing Page within the Tide app.

Enable redirection to the Interim Landing Page from external channels (SMS, Email, Push Notifications) to capture high-intent users outside the app ecosystem. Example:

1. **Discovery:** User receives a Push Notification: *"Get your RoarBank Credit Card! Exclusive offer inside."*
2. **Interaction:** User taps the notification.
3. **App Handover:** The Tide app launches directly onto the Interim Landing Page (bypassing the Home Screen).

Step 2: Interim Landing Page

This page serves as the bridge. It must contain:

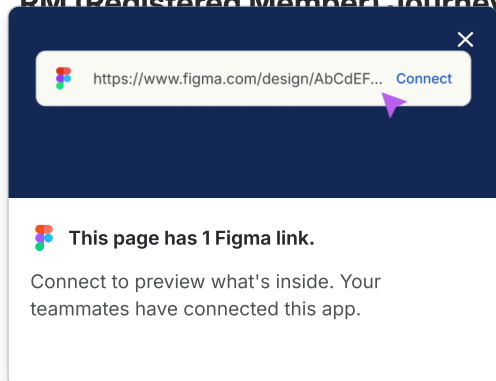

- **Offer Banner:** Visually appealing creative highlighting the current RoarBank card offer on the top of the screen.
- **USPs:** 3–4 bullet points of the card's key benefits (eg. "RPs on Dining", "Instant Approval").
- **Terms & Conditions:** A scrollable or expandable section containing the bank's legal disclosures.
- **Primary CTA:** A "Apply Now" button fixed at the bottom.

Step 3: Redirection (Handover)

- **Logic:** Upon clicking the CTA, the system checks if the RoarBank app is installed.
 - If Installed: Open RoarBank app via Deep Link.
 - If Not Installed: Redirect to the App Store/Play Store page for RoarBank.
- **Tracking:** Tide App must pass on Encrypted Key in the "uid" in the below link so that the corresponding application status of each member can be tracked through the real time dashboard and retargeting journey can be planned by the CRM team.

PM (Registered Member) Journey

point (Banner or Menu Item) titled "Apply for Credit Card."

Enable redirection to the Interim Landing Page from external channels (SMS, Email, Push Notifications) to capture high-intent users outside the app ecosystem. Example:

- 1. Discovery: User receives a Push Notification: *"Get your RoarBank Credit Card! Exclusive offer inside."*
- 2. Interaction: User taps the notification.
- 3. App Handover: The Tide app launches directly onto the RM Home screen where he can see the "Apply Credit Card" option.

Step 2: Redirection (Handover)

The offer section only on the RM Home screen will show disclaimers (T&Cs) and then the members will be redirected on clicking on the CTA. **Phase 2 of this journey will have a landing page (similar to KM journey) where members will be able to view USPs of the Credit Cards and Terms and Conditions.**

- Logic: Upon clicking the CTA, the system checks if the RoarBank app is installed.
 - If Installed: Open RoarBank app via Deep Link.
 - If Not Installed: Redirect to the App Store/Play Store page for RoarBank.

4. User Interaction & UI Design

Landing Page Components

Component	Description
Header	Tide x RoarBank branding.
Hero Section	Offer banner (Image/Text overlay).
Body Content	Structured list of USPs using high-contrast icons.
Footer	Disclaimer: "You are now being redirected to a third-party site..."
	High-visibility button "Apply Now" (e.g., Tide Blue or RoarBank Brand color).

5. Technical Specifications & Non-Functional Requirements

Tracking:

Below events need to be tracked in Looker:

1. Entry Point Clicks for RMs and KMs
2. Page View (Interim Page)
3. Scroll Depth (T&C section)
4. CTA Clicks

Security: Ensure no PII (Personally Identifiable Information) is passed in the URL parameters during redirection.

6. Vulnerable users:

6.1 Financial Capability: We would use plain-language USPs and structured iconography to ensure users of all literacy levels can clearly understand the cost and benefits of the credit card without being misled by jargons.

6.2 Emotional Resilience: The interim landing page acts as a transparent "speed bump" that prevents redirection shock by clearly notifying the member before they leave the familiar Tide environment for a third-party bank app.

7. Impacted Models:

None of the Data models are impacted with this journey.

8. Commercial Arrangement

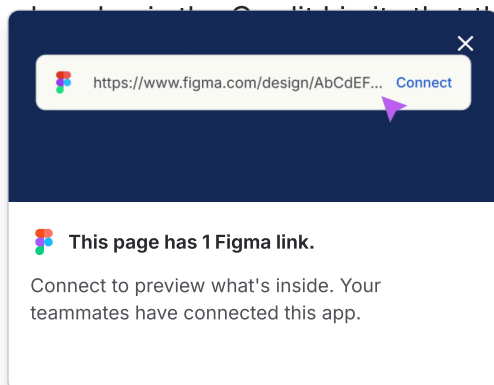

A slab-wise payout structure has been agreed with the partner bank wherein the payout will be

based on the Card limit that the members get assigned on successful approval on the Card. Payouts have been calculated basis multiple factors like Card limit, tenure, and marketing activities.

Payouts are applicable on Card activation only.

Payouts are applicable on Cards between 1st to 30th/ 31st of the month.

Payouts are applicable upon card cancellation in the first 3 months.

9. FAQs

Members can refer to the below link for any Product related queries and FAQs.
