

Benefit Cards - User Journey

User Story: Reimbursement Claim Against Fuel/Telecom Wallet Balance (or any other benefit wallet)

As an employee with a Tide benefit card

I want to claim reimbursement for fuel/telecom expenses paid from my personal funds

So that I can utilise my pre-allocated wallet balance and recover my out-of-pocket expenses in a tax-efficient manner

Background/Context:

- Employees may incur fuel or telecom expenses using personal funds (cash, personal card, bank transfer)
- Employees have pre-allocated balances in their fuel and telecom benefit wallets
- Reimbursement allows employees to monetize unused wallet benefits by providing proof of legitimate purchases
- This feature is only applicable for fuel and telecom wallets (+ more benefit wallets), not meal wallets
- Ops team 1 validates receipts before approval
- Upon approval, funds are transferred from the benefit wallet to the employee's general/main Tide account

Acceptance Criteria:

1. Initiating a Reimbursement Claim:

Given I am logged in as an employee

And I have sufficient balance in my fuel or telecom wallet

When I navigate to the reimbursement section

Then I should see:

- Option to "Submit Reimbursement Claim"
- My current fuel wallet balance
- My current telecom wallet balance

- List of pending/approved/rejected claims (if any)

Given I want to submit a reimbursement claim

When I click "Submit Reimbursement Claim"

Then I should be able to:

- Select claim type: Fuel or Telecom (Meal should not be available as an option)
- Enter expense amount
- Upload receipt/bill (file formats - PDF,JPG only)
- Add expense date
- Add optional description/notes
- See my available wallet balance for the selected category
- Submit the claim for review
- Bill number/Invoice number (Duplication check - explore in slice 3)
- Tide txn reference number - if txn happened on tide platform (optional - TBD)

Allow claim submission even when the expense claim amount is less than the benefit wallet balance

2. ~~Wallet Balance Validation:~~

~~**Given** I am submitting a reimbursement claim~~

~~**When** I enter the expense amount~~

~~**Then** the system should:~~

- ~~• Validate that I have sufficient balance in the respective wallet~~
- ~~• Display available balance: "Available balance: ₹[amount]"~~
- ~~• Show error if claim amount exceeds wallet balance: "Insufficient balance. Your current [fuel/telecom] wallet balance is ₹[amount]"~~
- ~~• Prevent submission if balance is insufficient~~

3. Receipt Upload Requirements:

Given I am uploading a receipt

When I select a file

Then the system should:

- Accept image formats (JPEG PDF only)
- Validate file size (max 5MB)
- Display preview of uploaded receipt
- Allow me to replace/delete the uploaded file before submission

- Require at least one receipt to be uploaded (mandatory field)

Given I upload an invalid file

Then I should see appropriate error messages:

- "File size must be less than 5MB"
- "Only JPEG, PNG, and PDF files are accepted"
- "Receipt is required to process your claim"

4. **Claim Submission Confirmation:**

Given I have filled all required fields correctly

When I submit the reimbursement claim

Then the system should:

- Display confirmation message: "Your reimbursement claim of ₹[amount] has been submitted successfully"
- Generate a unique claim reference number
- Send the claim to finance team for validation
- Update claim status to "Pending Review"
- Send me a notification confirming submission
- Show estimated review timeline (e.g., "Claims are typically reviewed within 2-3 business days")

5. **Viewing Claim Status:**

Given I have submitted reimbursement claims

When I view my claims list

Then I should see for each claim:

- Claim reference number
- Claim type (Fuel/Telecom)
- Claim amount
- Submission date
- Current status (Pending Review/Approved/Rejected)
- Uploaded receipt (viewable)
- Action date (approval/rejection date if applicable)
- Reason for rejection (if rejected)

6. **Finance Team/Ops team 1 Approval Process (BOT)**

Given I am a finance team member

When I review a reimbursement claim

Then I should be able to:

- View all claim details (amount, type, date, employee info, linked corporate)
- Download and review uploaded receipt
- Verify receipt authenticity and expense legitimacy
- Check employee's **current** wallet balance (real-time)

Choose from multiple approval options:

- **Full Approval** (if sufficient balance)
- **Partial Approval** (process available balance)
- **Rejection** (decline the claim)

Add comments/reason (mandatory for partial approval or rejection)

7. **Zero / Low Balance During Approval - Option 1: Immediate Rejection:**

Given I am a finance team member reviewing a claim

And the employee's current wallet balance is 0 (employee used all the balance)

When I attempt to approve the claim

Then the system should:

- Display prominent warning: "Cannot approve - Insufficient wallet balance"
- Show current wallet balance: ₹[current_balance]
- Show claim amount: ₹[claim_amount]
- Show shortfall: ₹[shortfall_amount]
- Require me to reject the claim
- Mandate adding a rejection reason

Given I reject a claim due to insufficient balance

When I add the rejection reason

Then the system should:

- Provide a pre-defined rejection reason option: "Insufficient wallet balance at the time of approval"
- Allow me to add additional comments
- Process the rejection
- Notify the employee with clear explanation- system

Given my claim is rejected due to insufficient balance

When I receive the rejection notification(updated in the claims view)

Then I should see:

- Notification: "Your reimbursement claim #[reference] for ₹[amount] has been rejected"
- Rejection reason: "Insufficient wallet balance at the time of approval"
- Notes - any additional notes entered by the action owner
- PN - slice 3 as it is good to have

7. **Approved Claim - Wallet Transfer:**

Given my reimbursement claim is approved by finance team

When the approval is processed

Then the system should:

- Debit the claim amount from my fuel/telecom benefit wallet
- Credit the same amount to my general/main Tide account
- Update claim status to "Approved"
- Update my reimbursement claim view: "Your reimbursement claim of ₹[amount] has been approved. Funds have been transferred to your primary account."
- Record the transaction in both main and benefit account timelines
- main and benefit account timeline credit and debit descriptions -
 - Benefit account - debit entry Main Tide account Benefit account
 - Main Tide account - credit entry from Benefit account
- Update my available wallet balances
- Credit PN - Slice 3

Given the wallet transfer is complete

When I check my account

Then I should see:

- Reduced balance in fuel/telecom wallet with transaction note: "Reimbursement claim #[reference]"
- Increased balance in general wallet with transaction note: "Reimbursement received - [Fuel/Telecom]"
- Transaction timestamps
- Ability to use the transferred amount via Tide card, bank transfer, or ATM withdrawal

8. **Rejected Claim Notification:**

Given my reimbursement claim is rejected by finance team

When the rejection is processed

Then I should:

- Receive notification: "Your reimbursement claim of ₹[amount] has been rejected"
- See rejection reason provided by finance team
- Have my wallet balance remain unchanged
- Be able to resubmit a new claim with corrected information/receipt if applicable

8. Insufficient Balance During Approval - Option 2: Partial Processing:

Given I am a finance team member reviewing a claim

And the employee's current wallet balance is less than the claim amount

When I choose to partially approve the claim

Then the system should:

- Display partial approval interface
- Show claim amount: ₹[claim_amount]
- Show available wallet balance: ₹[available_balance]
- Auto-calculate processable amount: ₹[available_balance]
- Show shortfall: ₹[claim_amount - available_balance]
- Require me to select disposition for remaining amount:
 - **Option B: Approve Partial Claim**
 - **Option C: Approve Full Claim**
- Mandate adding comments explaining the partial approval
- Display confirmation: "Approve ₹[available] now, and [selected option] for remaining ₹ [shortfall]?"

~~8a. Partial Approval—Option A: Remaining Amount Pending: (To be discussed with the team)~~

~~**Given** finance team approves partial claim with remaining amount pending~~

~~**When** the partial approval is processed~~

~~**Then** the system should:~~

- ~~• Transfer available balance (₹[available]) immediately:~~
 - ~~◦ Debit from fuel/telecom benefit wallet~~
 - ~~◦ Credit to general/primary Tide account~~
- ~~• Create a new linked claim for the remaining amount (₹[shortfall]):~~
 - ~~◦ Status: "Pending—Awaiting Balance"~~

- ~~Same receipt and details as original claim~~
- ~~Reference to original claim number~~
- ~~Auto-submit for approval when sufficient balance is available~~
- ~~Update original claim status to "Partially Approved"~~
- ~~Send notification to employee~~

Given I receive a partial approval notification (Option A)

~~-When~~ I view the notification

~~-Then~~ I should see:

- "Your reimbursement claim #[reference] has been partially approved"
- Approved amount: ₹[approved_amount] — "Transferred to your account"
- Pending amount: ₹[pending_amount] — "Will be processed when balance is available"
- ~~Wallet balance at approval: ₹[balance]~~
- ~~Original claim amount: ₹[original_amount]~~
- ~~Explanation: "Partial payment processed due to insufficient wallet balance. Remaining amount will be automatically processed once your wallet is topped up."~~
- ~~Link to view both transactions:~~
 - ~~Original claim (Partially Approved)~~
 - ~~Linked pending claim (Pending — Awaiting Balance)~~
- ~~Action required: "Contact HR to top-up your [fuel/telecom] wallet to receive remaining ₹ [pending_amount]"~~

Given my wallet is topped up after partial approval

~~-And~~ the new balance is sufficient to cover the pending amount

~~-When~~ the system detects sufficient balance

~~-Then~~ the system should:

- ~~Automatically notify finance team: "Claim #[reference] can now be fully processed. Pending amount: ₹[amount]"~~
- ~~Allow finance team to approve the pending portion~~
- ~~Process the remaining transfer upon approval~~
- ~~Update both claims to "Fully Approved"~~
- ~~Notify employee: "Your pending reimbursement of ₹[amount] for claim #[reference] has been processed"~~

8b. Partial Approval - Option B: Remaining Amount Rejected:

Given finance team approves partial claim and rejects remaining amount

When the partial approval is processed

Then the system should:

- Transfer available balance (₹[available]) immediately:
 - Debit from fuel/telecom benefit wallet
 - Credit to general/primary Tide account
- Mark remaining amount (₹[shortfall]) as rejected
- Update claim status to "Partially Approved - Remainder Rejected"
- Require finance team to add rejection reason for the remaining amount
- Send notification to employee

Given I receive a partial approval notification (Option B)

When I view the notification

Then I should see:

- "Your reimbursement claim #[reference] has been partially approved"
- Approved amount: ₹[approved_amount] - "Transferred to your account"
- Rejected amount: ₹[rejected_amount]
- Rejection reason for remaining amount
- Wallet balance at approval: ₹[balance]
- Original claim amount: ₹[original_amount]
- Explanation: "Partial payment processed. Remaining amount rejected due to insufficient wallet balance."
- Options:
 - "Submit New Claim" for the rejected amount (with same receipt)
 - "Contact HR" for wallet top-up
- Note: "You can resubmit a claim for ₹[rejected_amount] once your wallet is topped up"

9. ~~Resubmitting After Partial Rejection—Flip the partially approved entry:~~

~~**Given** part of my claim was rejected~~

~~**And** my wallet has been topped up~~

~~**When** I want to claim the remaining amount~~

~~**Then** I should be able to:~~

- ~~Click "Resubmit Rejected Amount" from the original claim details~~

- ~~System pre-fills:~~
 - ~~Claim type (same as original)~~
 - ~~Amount (rejected amount from original claim)~~
 - ~~Date (same as original)~~
 - ~~Receipt (same as original)~~
- ~~Add a reference note: "Continuation of claim #[original_reference]"~~
- ~~Submit for review~~
- ~~Finance team sees link to original claim for context~~

10. Resubmitting After Partial Rejection - Employee can create a new reimbursement claim entry with the same bill

De-duplication check to be build in Slice 3 - Either via OCR by checking receipt details OR by using invoice number (to be explored)

Slice 1 and 2 - Ops team has to check all previous reimbursement claim records

Business decision - Do not allow approval of reimbursement claim entry if the bill was previously submitted - either fully approved or partially approved

Exit Employee Case -

HR needs unused amounts to compute taxes at the time of FNF

Exit employees not present in EOY report

Exit employees- money can be given in general account - no need to pullback

User Story: Exit Employee Management and Benefit Wallet Settlement

As a Corporate HR Operations administrator

I want to manage exiting employees and process their unused benefit wallet balances according to policy

So that employees receive proper settlement of their benefits through payroll and the organization recovers unused allocations

Background/Context:

- Employees may exit the organization at any time during the financial year

- Different benefit wallets have different settlement rules upon exit
 - Food/meal and Rewards wallet balance can be carried forward or retained
 - Fuel and telecom wallet balances are moved to general wallet on last working day
 - Employer uses "Pullback" feature to recover all general wallet balance (freezes the account for 5 days)
 - Employee account is then delinked from the corporate
 - Employer settles the recovered amount through employee's salary account as part of FNF
 - Employees can use benefits until their last working day
-

Acceptance Criteria:

1. Marking Employee as Exiting (Slice 3)

Given I am logged in as a Corporate HR Operations administrator

When I need to process an employee exit

Then I should be able to:

- Search for the employee by name, employee ID, or email
- View employee's current benefit wallet balances
- Access "Mark as Exit Employee" option
- Enter exit details

Given I am marking an employee as exiting

When I enter the exit details

Then I should provide:

- Last working day (date picker)
- Exit reason (dropdown: Resignation / Termination / Retirement / End of Contract / Other)
- Exit type (dropdown: Voluntary / Involuntary)
- Additional notes (optional, 500 characters)
- Confirmation checkbox: "I confirm this employee's last working day is [date]"

Given I submit the exit employee form

When the system processes the request

Then the system should:

- Update employee status to "Exit - Pending"
- Display confirmation: "Employee marked for exit. Last working day: [date]"
- Send notification to Tide team: "Employee [name] - [ID] marked for exit. Last working day: [date]"
- Trigger automated workflow for benefit settlement
- Display next steps: "On last working day, benefit balances will be moved to general wallet. You will then need to use Pullback and Delinking options."
- Show estimated timeline for settlement process
- Provide option to send manual email notification to Tide team (for HR teams who prefer email communication)

2. **Email Notification to Tide Team: (Slice 3)**

Given I have marked an employee as exiting

When I choose to send email notification

Then the system should:

- Generate pre-formatted email to Tide team (pluxee@tide.com or configured email)
- Include:
 - Employee name and ID
 - Last working day
 - Current benefit wallet balances (Food, Fuel, Telecom, General)
 - Request to process benefit transfer on last working day
 - Meal and rewards funds should not be moved to the general wallet.
 - Only Fuel and Telecom wallet funds to be moved to general.
 - Request to freeze card on last working day
- Allow me to review and edit before sending
- Option to add CC recipients
- Send email and mark as "Notification Sent"
- Store email in audit trail

3. **Batch Exit Processing Slice 3:**

Given I have multiple employees exiting in the same month

When I want to notify Tide team in bulk

Then I should be able to:

- Select multiple employees from exit employee list

- Generate consolidated email with all employee details

4. **Tide Ops team marks employee as exit employee with exit date (using BOT) (Slice 2)**

- Case A: Mark employees exit date in BOT
- Case B: Exit Date Change - Given an exit employee's last working day changes
When HR Ops of the Corporate updates the exit date (till when can we allow date change?)
- Case C: Employee Cancels Exit (Retention) - Given an employee marked for exit decides to stay, HR Ops of the Corporate informs to cancel exit

5. **Employee View - Pre-Exit Period (Slice 2)**

Given I am an employee marked for exit

And my last working day has not passed

When I log in to my Tide account

Then I should see:

- Banner notification: "Your last working day is [date]. You can use your benefits until this date."
- Current wallet balances (Food, Fuel, Telecom, General)
- Information about settlement:
 - "Food wallet balance: Will be carried forward (no action needed)"
 - "Fuel & Telecom wallet balance: Will be moved to general wallet on your last working day"

6. **Automatic Benefit Transfer on Last Working Day**

Given today is the employee's last working day

When the system processes end-of-day operations

Then the system should:

- At end of business day (11:59 PM), automatically execute:
 - Transfer all fuel wallet balance to general wallet
 - Transfer all telecom wallet balance to general wallet
 - Retain food wallet balance as-is (no transfer)
 -
 - HR Ops of the Corporate to use 'Remove Employee' option to delink employee (to be automated in slice 3)
 - Show failed cases to Ops team?
- Update final wallet balances:
 - Food wallet: ₹[original_amount] - RETAINED

- Fuel wallet: ₹0 - TRANSFERRED
- Telecom wallet: ₹0 - TRANSFERRED
- General wallet: ₹[fuel + telecom + existing_general] - Record all transfer transactions with notes:
 - "Exit Settlement - Fuel to General: ₹[amount]"
 - "Exit Settlement - Telecom to General: ₹[amount]"

7. Tide Ops send a reply to Corporate HR Ops for Exit employee cases (manual) - to be automated in slice

Original email - acknowledgement receipt

End of the process confirmation to include -

- Process executed successfully/failed (retry details)
- For successful cases - Wallet wise Unused amounts, total amount given in general account, reiterate how the employee can use the amount from general account (ATM, bank transfer, card spend - so that HR can frame their communication to their employee), delinking using remove option timeline,
- For Failed cases - Failure reason (generic), retry timeline

7. Employee Communication Throughout Exit Process (Slice3):

Given I am an employee going through exit process

Then I should receive notifications at each stage:

Stage 1 - Exit Marked:

- "Your exit has been processed. Last working day: [date]"
- "You can continue to use your Tide benefit card until [date]"
- "Your unused benefit balances will be settled through your salary account as part of FNF"

Stage 2 - Account Delinked

- "Your Tide benefit account has been closed as part of your exit process"
- "Settlement amount: ₹[amount] will be processed through payroll/FNF"
- "For settlement queries, contact HR department"
- "Thank you for using Tide benefits at [Company Name]"

Slice 2 - We will need to notify the employee that all unused funds in benefit accounts are moved to the main Tide account. You can use the money on your existing Tide card, bank

transfers and ATM withdrawals. Click here to check

A2A transfer notifications - [Prateek Kumar Khurana](#) to come back

8. Special Cases:

Case A: Employee with Zero Wallet Balance

Given an employee exits with zero balance in fuel, telecom, and general wallets

And only has food wallet balance

When the last working day processing occurs

Then the system should:

- Pullback initiated
- Skip benefit transfer (nothing to transfer)
- Delinking complete
- **3. End of the Year -**

3.1 Corporate Web portal

User Story: Configure Financial Year Cut-off Date for Benefit Wallets - Possibly in BOT via Partner creation form (Slice 2)

As a Corporate HR Operations administrator

I want to set and manage the financial year cut-off date for employee benefit wallets

So that benefit wallet balances are automatically processed according to our payroll timeline requirements

Acceptance Criteria:

1. Setting the Cut-off Date: - Slice 4

Given I am logged in as a Corporate HR admin

When I navigate to the benefit wallet settings section

Then I should see an option to "Set Financial Year Cut-off Date"

Given I want to set a cut-off date

When I select a date

Then the system should:

- On the cut-off date -

- Automatically calculate and display when the year-end report will be available (cut-off date + 8 days)
- Show a confirmation message: "Year-end report will be ready for download by [date]"
- Execute fund movement

3.2 Employee experience

Userstory - User Story: End of Financial Year Benefit Wallet Management

Given the financial year cut-off date has been reached

When I have unused balance in my benefit wallets

Then the following should occur:

1. Automatic Fund Transfer:

- All benefit wallet balances (fuel, transportation, etc.) except food wallet are automatically transferred to my general wallet
- Food wallet balance is carried forward to the next financial year without transfer

2. Post-Transfer Options: Once funds are in my general wallet, I can:

- Use the balance via my Tide card
- Transfer money to my linked bank account
- Withdraw cash from an ATM

3. Pre-Cut-off Communication (Good to Have):

- **Given** my corporate has defined a cut-off date
- **When** the cut-off date is approaching
- **Then** I should see a banner notification stating:
 - "Please use your benefit account balances by [XX date]"
 - Warning that unused amounts will be moved to main Tide account
 - Information that transferred amounts will be taxable

4. Agent Experience/Ops team experience- Year end process - funds transfers to general - some txns could fail - what should be the agent view to show such failures - what operations can agent perform to resolve such cases??

Account Closure

Employees do not get to opt out of benefit cards or an option for account closure as they have opted for this as a part of their salary structure

Employers give an option to opt out in the middle of the year (typically in Oct)

Benefit card holder account closure can be applicable in the following cases -

1. Employee makes changes in Payroll about changes in middle of the year (oct) about opt out - as a result HR will stop rolling out benefits from subsequent months
 - If employee initiates account closure - Before financial year end - Employee will get an option for Account closure if they utilized all balances
 - After financial year end - If balance available in meal wallet - Account closure should give an error - please use meal wallet balance

1.b Employee resigned and exited (delinked from Corporate SP) - has balance in food benefit wallet -

If balance available in meal wallet - Account closure should give an error - please use meal wallet balance

If balance in meal wallet is not available - then account closure should be possible

Scenario - Very small unused amount in the meal wallet - account closure will be stuck in this case because it won't be possible for an employee to use it
