

Benefit Card Reimbursement Scenarios

Type of Employee	Scenario	Description	Product flow
Regular employee cases	Unused money - anytime in the financial year	Employee has money in their food, fuel or any other benefit wallet from previous month/months The money stays in the respective wallets for the employee to use till the cut-off date of the financial year	
	Unused money - end of the financial year The cut-off dates are confirmed by Corporates	Employee has money in their food, fuel or any other benefit wallet on the cut-off date, the following happens - 1. Money from all benefit wallet (except food) gets auto-drawn to the general wallet - from there

	complete data after the cut-off, we set the cut-off date accordingly. For example, since we needed the data by March 20th for payroll processing, the cut-off date was aligned to ensure timely receipt.	onwards, employee has 3 choices - a. Use the balance via Tide card from general wallet b. Withdraw money in their linked bank account c. ATM withdrawal	
	Reimbursement filed (only applicable for fuel and telecom only - not applicable for meal wallet) Employee has	When an employee incurs fuel expenses using personal funds, they can claim reimbursement against their pre-allocated fuel wallet balance. The process involves submitting authentic fuel receipts for finance team validation. Once

approved, the system performs a wallet transfer - debiting the designated fuel benefit wallet and crediting the employee's primary account, enabling them to recover their out-of-pocket fuel expenses while utilizing their tax-efficient benefit allocation

This process essentially allows employees to monetize their unused fuel benefits by providing proof of legitimate fuel purchases made through personal payment methods
